Day 2 Task: Basic Linux Commands

Task: What is the linux command to

1. Check your present working directory.

➜ **pwd**

2. List all the files or directories including hidden files.

➜ **ls -la**

3. Create a nested directory A/B/C/D/E

➜ **mkdir -p A/B/C/D/E**

```
ubuntu@ip-172-31-92-131:~$ tree
.
├── A
│   └── B
│       └── C
│           └── D
│               └── E
├── Colors.txt
├── devops.txt
├── fruit.txt
└── snap
    └── tree
        ├── 18
        ├── common
        └── current -> 18

10 directories, 3 files
```
